

# Your Google presence, analysed.

## Parramatta Dental Surgery

Prepared for Michael · Parramatta, Sydney · 1 June 2026

### Executive Summary

Parramatta Dental Surgery is visible in local search but underperforming against competitors on every measurable metric. With a 4.1★ rating, 138 reviews, and missing core profile elements like a website link, photos, and business hours, the listing is losing enquiries to better-optimised competitors daily. The foundation is there — but without immediate fixes, the gap will widen.

#### YOUR GOOGLE RATING

#### RATING ANALYSIS

### What your star rating means

At 4.1★, Parramatta Dental Surgery sits 0.6 stars below the competitor average of 4.7★. For a dental practice, this is significant — patients treat low ratings as a safety signal. Studies consistently show conversion drops sharply below 4.5★. Competitors with 4.7★ will win the click the majority of the time when listings appear side by side.

## REVIEW ANALYSIS

### Review count vs competitors

138 reviews versus the competitor average of 200 means a gap of 62 reviews. To close that within 90 days, the practice needs roughly 21 new reviews per month — achievable with a structured ask system at point of care. Without one, organic review growth for most dental practices runs at 2–4 per month, meaning the gap grows, not shrinks.

## PROFILE GAPS

### What's missing from your profile

Three critical gaps identified: 1. No website linked — removing a key trust signal and blocking traffic to bookings 2. No business hours listed — Google may suppress the listing in time-sensitive searches like "dentist open now" 3. Photos absent or unverified — listings with photos receive 42% more direction requests per Google's own data. This is a low-effort, high-impact fix being ignored.

## PRIORITY ACTIONS

### The 3 things to fix first

- 1** Add website URL, confirmed business hours, and 10+ real photos to the Google Business Profile this week — these are free fixes with immediate ranking and conversion impact.
- 2** Launch a post-appointment review request via SMS — target 15–20 new reviews in the first 30 days to begin closing the 62-review gap and pushing the rating above 4.5★.
- 3** Build a consistent citation presence across Australian directories (True Local, Healthengine, Yellow Pages, Hot Frog) — unverified or inconsistent NAP details suppress local pack rankings.

## WHAT GROWVERA DOES

### Your 4-week delivery plan

#### WEEK 1

##### Full Profile Optimisation

Categories, description, photos, Q&A — everything Google needs to rank you higher.

#### WEEK 2

##### 25 Directory Citations

Your business listed consistently on 25 major Australian directories.

#### WEEK 3

##### Review System Live

#### WEEK 4+

##### 25 More Citations + Reports

Automated review requests to your customers after each job or appointment.

50 total citations built. Monthly plain-English reports showing your progress.

#### EXPECTED OUTCOME

## What to expect in 60 days

Within 60 days, a realistic outcome is: profile completeness reaching 85+/100, 25–40 new reviews collected (pushing count toward 175 and rating potentially above 4.4★), and citation consistency established across 50+ directories. Local pack visibility should improve for suburb-level searches. A jump to 4.7★ is not guaranteed in 60 days — that requires sustained review volume over 3–6 months.

### If your visibility doesn't improve in 60 days, your next month is free.

We back every engagement with this commitment. We work until the results are real — no wriggle room, no excuses.
