Parramatta Dental Surgery

Prepared for Michael · Parramatta, Sydney · 1 June 2026

Executive Summary

Parramatta Dental Surgery shows up in local search, which is a baseline win — but the profile is visibly incomplete and underperforming against local competitors. With no website linked, unclear hours, no photos, and a rating 0.6 stars below the local average, the practice is likely losing new patient enquiries to better-optimised competitors every day. There's meaningful room to improve, and the gaps are fixable.

RATING ANALYSIS

What your star rating means

At 4.1★ versus the local competitor average of 4.7★, Parramatta Dental Surgery sits noticeably below the benchmark patients use to shortlist providers. Research consistently shows ratings below 4.5★

reduce click-through rates on Google Maps. That 0.6-star gap isn't trivial — for a high-consideration service like dentistry, many patients will scroll past without a second look.

REVIEW ANALYSIS

Review count vs competitors

138 reviews versus a competitor average of 200 means a deficit of roughly 62 reviews. To close that gap within 90 days, the practice would need approximately 21 new reviews per month — roughly 5 per week. That's achievable with a structured post-appointment request system, but won't happen organically at current rates. Review velocity matters as much as total count in Google's local ranking algorithm.

PROFILE GAPS

What's missing from your profile

Four specific issues identified: 1. **No website linked** — Google treats this as an incomplete profile and patients can't verify the practice 2. **Business hours missing or unclear** — a top reason patients abandon a listing 3. **No photos present** — dental practices without photos see significantly lower profile engagement 4. **No apparent review response activity** — unanswered reviews signal low engagement to both Google and patients

PRIORITY ACTIONS

The 3 things to fix first

- 1 Link the website and complete all profile fields today** — hours, services, business description, and category. This is free and takes under 30 minutes. It directly affects ranking eligibility.
 - 2 Add a minimum of 10 real photos this week** — interior, exterior, and team shots. Practices with photos receive 42% more direction requests, per Google's own data.
 - 3 Implement a post-appointment SMS or email review request** — targeting 5 reviews per week to close the competitor gap within 90 days and begin lifting the 4.1★ rating.
-

WHAT GROWVERA DOES

Your 4-week delivery plan

WEEK 1

Full Profile Optimisation

WEEK 2

25 Directory Citations

Categories, description, photos, Q&A — everything Google needs to rank you higher.

Your business listed consistently on 25 major Australian directories.

WEEK 3

Review System Live

Automated review requests to your customers after each job or appointment.

WEEK 4+

25 More Citations + Reports

50 total citations built. Monthly plain-English reports showing your progress.

EXPECTED OUTCOME

What to expect in 60 days

Within 60 days, a realistic outcome is: profile completeness score moving from ~41 to 75+, 20–30 new verified reviews added (lifting rating toward 4.3–4.5★), and improved visibility in the Google Maps 3-pack for Parramatta dentist searches. Citation building typically takes 30–45 days to index. A jump to 4.7★ or 200+ reviews in 60 days would be overpromising — but measurable progress is realistic and trackable.
