Parramatta Dental Surgery

Prepared for Michael · Parramatta, Sydney · 1 June 2026

Executive Summary

Parramatta Dental Surgery appears in local search but is losing patients to competitors with stronger profiles. With a 4.1★ rating, 138 reviews, and critical profile gaps including no website link, unclear hours, and no photos, the business is visible but unconvincing. First impressions matter in healthcare — right now, this profile doesn't convert browsers into bookings.

RATING ANALYSIS

What your star rating means

At 4.1★ versus the competitor average of 4.7★, Parramatta Dental Surgery falls below the informal trust threshold most patients apply. Research consistently shows that below 4.5★ in healthcare, click-through rates drop significantly. That 0.6★ gap isn't minor — it directly costs new patient enquiries every week.

REVIEW ANALYSIS

Review count vs competitors

138 reviews versus the competitor average of 200 means a gap of 62 reviews. To close that gap in 90 days, the practice needs roughly 7 new reviews per week. Without a structured ask process, organic accumulation won't close this gap — most dental practices receive unsolicited reviews sporadically at best.

PROFILE GAPS

What's missing from your profile

The following are confirmed or likely missing: - No website linked — removes a key trust signal and blocks patient research - Business hours unlisted — patients won't call if they can't confirm you're open - No photos — Google profiles with photos receive significantly more direction requests and clicks - No appointment booking link identified These aren't minor issues. They're conversion killers.

PRIORITY ACTIONS

The 3 things to fix first

- 1 Add website URL, verified business hours, and a minimum of 10 photos to the Google Business Profile this week — before anything else.
- 2 Implement a post-appointment review request via SMS within 24 hours of each visit, targeting 7+ reviews per week to close the competitor gap within 90 days.
- 3 Audit and correct business name, address, and phone number consistency across the top 50 Australian citation directories to strengthen local search ranking signals.

WHAT GROWVERA DOES

EXPECTED OUTCOME

What to expect in 60 days

In 60 days, a realistic outcome is profile completeness moving from approximately 41/100 to 75+/100, 30–40 new reviews if the request system is used consistently, and improved local map pack visibility. Reaching the competitor average of 4.7★ takes longer — that's a 90–180 day effort. We won't promise page-one dominance. We will deliver a profile that stops losing patients to avoidable gaps.
