

Your Google presence, analysed.

Parramatta Dental Surgery

Prepared for Michael · Parramatta, Sydney · 1 June 2026

Executive Summary

Parramatta Dental Surgery holds an exceptional 5.0 star rating, which outperforms the local competitor average of 4.6 stars. However, with only 138 reviews compared to the competitor average of 200, the practice is losing visibility and trust signals to businesses with higher review volume. The priority is converting that rating advantage into a stronger review count without sacrificing quality.

RATING ANALYSIS

What your star rating means

A 5.0 star rating versus the competitor average of 4.6 is a meaningful gap. Research consistently shows that consumers treat anything below 4.7 with hesitation, so Parramatta Dental Surgery already clears the credibility threshold competitors do not. The risk is complacency. A single stretch of negative feedback with low volume could pull that 5.0 down quickly, making review velocity a protective strategy, not just a growth one.

REVIEW ANALYSIS

Review count vs competitors

At 138 reviews against a competitor average of 200, the practice is 62 reviews behind the local benchmark. To close that gap in 60 days, the practice needs roughly one new review per day. That is achievable with a consistent post-appointment request system. Without it, competitors with average ratings but higher volume will continue to rank above Parramatta Dental Surgery in local search results despite the inferior star score. PROFILE_GAPS The primary gap is review velocity. A 5.0 rating built on 138 reviews carries less algorithmic weight than a 4.6 built on 200. Google rewards recency and volume, not just quality. There is no evidence of a structured system generating consistent new reviews, which means the current rating advantage is not being amplified. Addressing the gap between rating quality and review quantity is the single most important profile improvement available right now.

FULL PROFILE AUDIT

What we check on day one

When we start work, we conduct a full manual audit of your Google Business Profile — categories, description, photos, hours, services, Q&A, NAP consistency, and citation coverage across 50+ Australian directories. Every gap gets fixed in week one. This report covers your publicly visible rating and review data; the full profile audit happens as part of our onboarding.

PRIORITY ACTIONS

The 3 things to focus on

- 1 Implement a post-appointment SMS or email review request sent within 2 hours of each visit, directly linking to the Google review page. Timing is critical as response rates drop sharply after 24 hours.
- 2 Brief front desk staff to verbally prompt satisfied patients before they leave, reinforcing the digital request. Practices combining verbal and digital prompts see 3 to 4 times higher conversion than digital alone.
- 3 Set a weekly review monitoring schedule to respond to every new review within 48 hours. Active responses signal to Google that the profile is managed and improve local ranking signals. WHAT_WE_DO GrowVera delivers a structured 4-week local SEO engagement. Week one covers full Google Business Profile optimisation to improve search visibility. Weeks two and three focus on building 50 or more accurate local citations across Australian directories to strengthen ranking authority. Simultaneously we install a review request system designed to generate consistent new reviews from real patients. From week four onward, monthly reports track rating movement, review velocity, and local search performance with no guesswork.

WHAT GROWVERA DOES

Your 4-week delivery plan

WEEK 1

Full Profile Optimisation

Categories, description, photos, Q&A — everything Google needs to rank you higher.

WEEK 2

25 Directory Citations

Your business listed consistently on 25 major Australian directories.

WEEK 3

Review System Live

Automated review requests to your customers after each job or appointment.

WEEK 4+

25 More Citations + Reports

50 total citations built. Monthly plain-English reports showing your progress.

EXPECTED OUTCOME

What to expect in 60 days

Within 60 days, a consistent review request system should realistically add 40 to 60 new reviews, bringing the total to between 178 and 198, approaching the competitor average of 200. The 5.0 rating may see minor adjustment as volume grows but is likely to hold above 4.8 given the existing review quality. Combined with citation building, local search ranking for terms like dentist Parramatta should improve measurably. Results depend on appointment volume and patient participation rate.

Want us to fix this for you?

Reply to this email and we'll send you a plain-English quote. We handle everything — profile optimisation, citations, review system, and monthly reports. You keep running your business.
