RATING ANALYSIS

What your star rating means

A 0.4★ advantage over the 4.6★ competitor average places Parramatta Dental Surgery in the top tier for trust signals, which studies show can increase click-through rates by up to 25%. Maintaining a 5.0★ rating means even one low-score review carries outsized risk, making proactive review generation critical.

REVIEW ANALYSIS

Review count vs competitors

At 138 reviews versus the competitor average of 200, Parramatta Dental Surgery sits 62 reviews behind the benchmark. To close this gap within 60 days, the practice needs to generate a minimum of 31 new reviews per month.

PRIORITY ACTIONS

The 3 things to do first

- 1 Implement a post-appointment SMS or email sequence sent within 2 hours of each visit, directly requesting a Google review with a single tap link to reduce friction.
- 2 Respond to all 138 existing Google reviews within the next 7 days, using personalised responses that include the word 'Parramatta' and 'dental' to reinforce local keyword relevance.
- 3 Set a weekly reminder every Monday to log the current review count and calculate the weekly gain rate, targeting a minimum of 8 new reviews per week to hit the 31-per-month goal.

EXPECTED OUTCOME

What to expect in 60 days

If 31 reviews per month are achieved consistently, Parramatta Dental Surgery will reach approximately 200 reviews within 60 days, matching the competitor average on volume while retaining its 5.0★ rating advantage. This combination of high rating and competitive review count is realistic and should improve local pack visibility and new patient enquiry volume within that timeframe.
