RATING ANALYSIS

What your star rating means

A 0.4★ advantage over the 4.6★ competitor average means Parramatta Dental Surgery ranks more favourably in Google's local algorithm, which typically favours higher-rated businesses in the local pack. This rating edge can directly increase click-through rates by an estimated 10–15% among new patients comparing options.

REVIEW ANALYSIS

Review count vs competitors

At 138 reviews versus the competitor average of 200, the business is 62 reviews behind the benchmark for perceived authority in this niche. To close that gap within 60 days, the practice needs to generate a minimum of 31 new reviews per month, roughly 1 per day.

PRIORITY ACTIONS

The 3 things to do first

- 1 Implement a post-appointment SMS or email follow-up sequence sent within 2 hours of each visit, containing a direct Google review link to capture feedback while the experience is fresh.
- 2 Respond to every existing Google review within 48 hours using personalised replies that include the phrase 'Parramatta dental care' to reinforce local keyword relevance.
- 3 Set up a weekly tracking sheet logging new review count, average rating, and date of each review to measure velocity and identify drop-off points in the follow-up process.

EXPECTED OUTCOME

What to expect in 60 days

If 31 reviews per month are consistently achieved, the business can reach approximately 200 reviews within 60 days, matching the competitor average and significantly strengthening local pack ranking signals. Maintaining the 5.0★ rating throughout this growth phase is critical and realistic given the current review quality trend.
