RATING ANALYSIS

What your star rating means

A 0.4★ advantage over the 4.6★ competitor average places Parramatta Dental Surgery in a stronger conversion position, as studies show patients favour businesses rated above 4.8★. Maintaining a 5.0★ rating while closing the volume gap could meaningfully increase click-through rates from Google local results.

REVIEW ANALYSIS

Review count vs competitors

At 138 reviews versus the competitor average of 200, the practice needs 62 more reviews just to reach parity, and likely more to dominate local rankings. To close this gap within 60 days, the practice needs to generate a minimum of 10 to 11 new verified reviews per month.

PRIORITY ACTIONS

The 3 things to do first

- 1 Implement a post-appointment SMS or email follow-up sequence sent within 2 hours of each visit, containing a direct Google review link, targeting at least 3 review submissions per week from satisfied patients.
- 2 Respond to all 138 existing Google reviews within the next 14 days, using personalised responses that include the words 'Parramatta' and 'dental care' to reinforce local relevance signals.
- 3 Set up a weekly tracking log measuring new review count, average rating, and review velocity to identify whether the practice is on pace to hit the 200-review benchmark within 60 days.

EXPECTED OUTCOME

What to expect in 60 days

If the practice consistently generates 10 to 11 new reviews per month, it can reach the 200-review competitor average within approximately 60 days while likely maintaining its 5.0★ rating. This combination of high rating and improved volume is a realistic position that strengthens local pack visibility and new patient trust in the Parramatta area.
